STATISTICAL SCIENCE

Contents of Volume 18 (2003)

ARTICLES

ANSCOMBE, F. R. Quiet Contributor: The Civic Career and Times of John W. Tukey, 287–310

BAKER, HENRY V. Comment on Sebastiani, Paola, Gussoni, Emanuela, Kohane, Isaac S. and Ramoni, Marco F., 60–64

BERAN, RUDOLF. The Impact of the Bootstrap on Statistical Algorithms and Theory, 175–184

BERGER, JAMES O. Could Fisher, Jeffreys and Neyman Have Agreed on Testing? 1–12

BERGER, JAMES O. Rejoinder, 28–32

BERLINER, L. MARK. Uncertainty and Climate Change, 430–435

BOLDRICK, JENNIFER C. (see Dudoit, Sandrine)

BOOS, DENNIS D. Introduction to the Bootstrap World, 168–174

BRILLINGER, DAVID R. Three Environmental Probabilistic Risk Problems, 412–421

CASELLA, GEORGE. Introduction to the Silver Anniversary of the Bootstrap, 133–134

CASELLA, GEORGE. Foreword, 283–284

CASELLA, GEORGE AND PIEGORSCH, WALTER W. Introduction to the Special Section on Statistics and the Environment, 411

CHRISTENSEN, RONALD. Comment on Berger, James O., 12–13

CHU, GILBERT. (see Tibshirani, Robert)

CHURCHILL, GARY A. Comment on Sebastiani, Paola, Gussoni, Emanuela, Kohane, Isaac S. and Ramoni, Marco F., 64–69

CRESSIE, NOEL AND KORNAK, JOHN. Spatial Statistics in the Presence of Location Error with an Application to Remote Sensing of the Environment, 436–456

DAVISON, A. C., HINKLEY, D. V. AND YOUNG, G. A. Recent Developments in Bootstrap Methodology, 141–157

DUDOIT, SANDRINE, SHAFFER, JULIET POPPER AND BOLDRICK, JENNIFER C. Multiple Hypothesis Testing in Microarray Experiments, 71–103

EFRON, BRADLEY. Second Thoughts on the Bootstrap, 135–140

ERNST, MICHAEL D. AND HUTSON, ALAN D. Utilizing a Quantile Function Approach to Obtain Exact Bootstrap Solutions, 231–240

FERNHOLZ, LUISA TURRIN. Remembering John W. Tukey, 336–340

FOKIANOS, KONSTANTINOS AND KEDEM, BENJAMIN. Regression Theory for Categorical Time Series, 357–376

GEORGE, A. W. AND THOMPSON, E. A. Discovering Disease Genes: Multipoint Linkage Analysis via a New Markov Chain Monte Carlo Approach, 515–532

GUSSONI, EMANUELA. (see Sebastiani, Paola)

HALL, PETER. A Short Prehistory of the Bootstrap, 158–167

HARTIGAN, J. A. A Memory of John Tukey as a Teacher, 341

HASTIE, TREVOR. (see Tibshirani, Robert)

HINKLEY, D. V. (see Davison, A. C.)

HOAGLIN, DAVID C. John W. Tukey and Data Analysis, 311–318

HOLMES, SUSAN. Bootstrapping Phylogenetic Trees: Theory and Methods, 241–255

HOROWITZ, JOEL L. The Bootstrap in Econometrics, 211–218

HUTSON, ALAN D. (see Ernst, Michael D.)

JOHNSON, WESLEY O. Comment on Berger, James O., 13–16

KAFADAR, KAREN. John Tukey and Robustness, 319–331

KEDEM, BENJAMIN. (see Fokianos, Konstantinos)

KOHANE, ISAAC S. (see Sebastiani, Paola)

KORNAK, JOHN. (see Cressie, Noel)

LAHIRI, P. On the Impact of Bootstrap in Survey Sampling and Small-Area Estimation, 199–210

LAURITZEN, STEFFEN L. AND SHEEHAN, NUALA A. Graphical Models for Genetic Analyses, 489–514

LAVINE, MICHAEL. Comment on Berger, James O., 16–18

LELE, SUBHASH R. Comment on Berger, James O., 18–19

LELE, SUBHASH R. Impact of Bootstrap on the Estimating Functions, 185–190

LINDSAY, BRUCE G. AND QU, ANNIE. Inference Functions and Quadratic Score Tests, 394–410

MALLOWS, COLIN. John Tukey at Bell Labs, 332–335

MAYO, DEBORAH G. Comment on Berger, James O., 19–24

MORGENTHALER, STEPHAN. John W. Tukey as Teacher, 342–345

NARASIMHAN, BALASUBRAMANIAN. (see Tibshirani, Robert)
